

**PCC BakkiSilicon strives to conduct its activities in a sustainable manner through adherence to its environmental management system and compliance with its environmental commitments, legal or otherwise”**

PCC BakkiSilicon hf. recognizes that its production leaves a carbon footprint, and aims to conduct its activities in a sustainable manner. PCC BakkiSilicon is committed to minimizing the negative impact it has on the environment and complying with its legal obligations. PCC BakkiSilicon strives to reach its environmental goals through continuous improvements and adherence to its environmental management system. The main areas of focus are:

- Carbon footprint
- Emission of pollutants into the air
- Waste handling
- Secondary materials
- Regulatory compliance

PCC BakkiSilicon aims to achieve its strategic objectives through:

- Planning the organization’s development based on environmentally friendly technologies and the best available technology
- Identification and ongoing analysis of all environmental aspects
- Assessment of risks and opportunities related to significant environmental aspects
- Building a sense of awareness and responsibility among employees and business partners for activities that have an impact on the environment
- Continuous improvements and adherence to its environmental management system

The Management Board of the company involved in the implementation of this Policy, communicates it to all Employees and Business Partners and obliges them to implement it.
